SUMMARY

Aspiring Software Developer with a strong foundation in Python, JavaScript, and PHP. Experienced in backend development in some college projects, AI-focused research, and digital marketing strategies. Proficient in UI/UX design and familiar with version control systems. Eager to contribute to your team by leveraging technical skills and innovative solutions.

Also, Developed a Task Manager application using Python with Django framework for backend operations, implementing full CRUD functionalities and integrating with a Git version control system to manage code changes and collaboration. My quick learning strength helps me to grasp things easily and hence i ahve works under various sub departments like HR, Testing, Development, Graphic Designing, Social Media Management, Research & Analysis.

EXPERIENCE

*Solskyy Digital Solutions, **Associate Intern***

Oct 2025 - Present

Contributed to AI-focused research and digital branding initiatives, converting technical concepts into engaging content. Created blogs, LinkedIn posts, and marketing content, enhancing company branding and industry trends. Designed AI and Canva-based creatives and assisted in LinkedIn profile optimization, improving reach and engagement.

*Code Alpha, **Python Programmer Intern***

Jun 2025 - Sep 2025

Learned and applied core Python concepts. Wrote and debugged code for small tasks. Practiced problem-solving using data structures. Gained exposure to backend development basics.

*Cognifyz Technology, **Software Development Intern***

Jun 2025 - Jul 2025

Created a Temperature Converter using Python for unit conversions. Built logic-based Pattern Printing programs using loops. Developed a Task Manager with full CRUD operations. Strengthened core Python skills through hands-on coding. Gained exposure to real-world backend development.

*Briskcovey Technologies, **Quality Analyst***

Jun 2024 - Apr 2025

Key Responsibilities Analyze business requirements and prepare detailed test plans, test cases, and test data. Perform different types of testing such as Functional, Regression, Smoke, Sanity, UI/UX, and Cross-browser testing. Log, track, and verify defects using Azure DevOps / JIRA (or the tool you used). Ensure defects are fixed and retested before release. Collaborate with developers and product managers to clarify requirements and resolve issues. Conduct end-to-end testing to ensure smooth functionality and user experience. Prepare daily/weekly QA reports and share with the team. Participate in sprint planning and agile ceremonies. Skills & Tools Manual Testing (Web & Mobile Applications). Test case design and execution. Defect management tools (Azure DevOps, JIRA, etc.). Knowledge of SDLC & STLC. Basic automation testing knowledge (Selenium/Python). Strong analytical, communication, and problem-solving skills.
